

FINANCE FOR ALL

FINANCIAL ANALYSIS

The development of this financial application came from shared knowledge between F5tci and its partner all@work, with the aim of addressing the problems and challenges expressed by several professionals in this role. Built on Qlik Sense platform, this application offers democratization of financial information across the organization.

Detailed financial analysis

Detailed exploration on financial items, and traceability features at the accounting level.

Quick view on financial position

Related to customers and suppliers, as well as return on investments.

Agile report reconfiguration

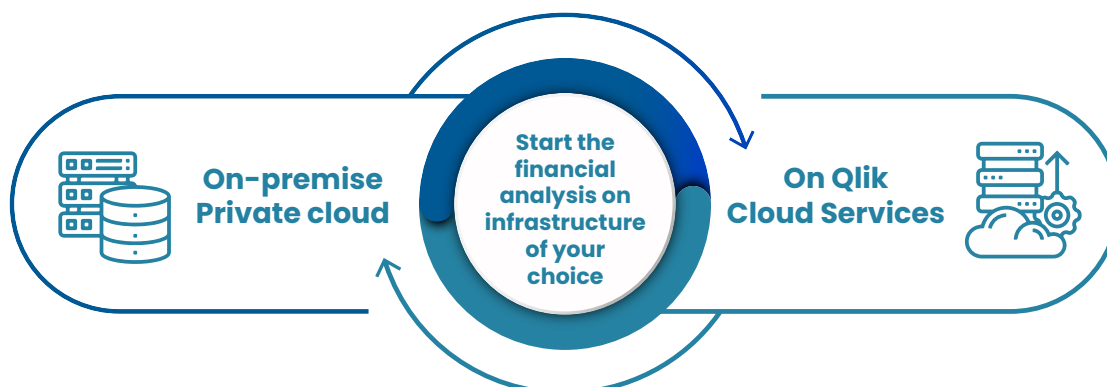

Ability to easily adapt to different business scopes and hierarchies.

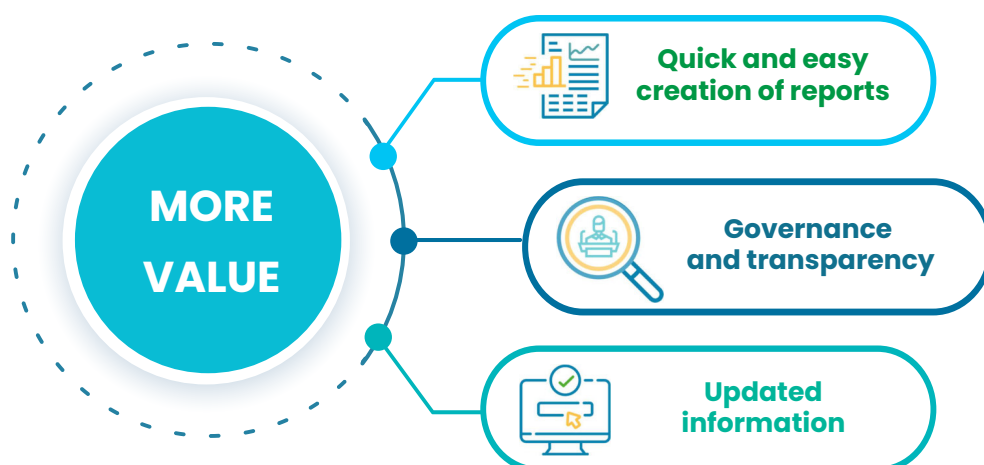

Improved planning and budgeting

Forecast optimization and consolidation of all data.

Application supported by Qlik Sense Enterprise SaaS and Qlik Sense Enterprise Client-Managed

Easy connectivity for common market ERP solutions.

KNOW MORE

www.f5tci.com

Data is structured and presented without manual intervention, reducing human error and improving compliance. Tables, graphs and financial key performance indicators, are created without the need to consume resources, freeing them for value-added tasks.

More time for data analysis and to improve processes.

Patrícia Santos, Senior Consultant, all@work
